

Rug Care Guide - Handmade Wool & Bamboo Silk Rugs

1. Regular Vacuuming

- Vacuum your rug at least once a week, more often in high-traffic areas or if pets are present.
- Use a low-suction vacuum or an upholstery attachment to avoid pulling or damaging delicate fibers.
- Avoid using a beater bar, as it can cause fiber shedding or wear, especially in bamboo silk areas.
- Every few months, vacuum the underside of the rug to remove accumulated dust.

2. Spot Cleaning

- Blot spills immediately with a clean, white cloth or paper towel.
- Do not rub - this can damage the fibers and spread the stain.
- For tougher stains, use a wool-safe detergent or a mix of water and white vinegar (test on a small hidden area first).
- After cleaning, blot with a clean damp cloth to remove any residue and allow to air dry completely.
- Never saturate the rug or use excessive water - bamboo silk is particularly moisture-sensitive.

3. Professional Cleaning

- Have the rug professionally cleaned every 6 to 12 months, or as needed.
- Choose a specialist with experience in cleaning handmade wool and silk rugs.
- Avoid steam cleaning or harsh chemicals, as they can harm the natural fibers and dyes.
